DISCLAIMER: All parts are exact fits. In order to ensure a proper fit, begin tightening threads by hand.

Cradle

1 – Align **Side Panel (#2)** with **End Panel (#3)** as shown below. Attach using 6 **Gold Bolts (#5)**. Begin fitting by hand screwing bolts into place and tightening to a loose fit with the **4mm Allen Tool (#6)**

* **Note** * - Please refer to the display below for the proper direction of the **Side Panel (#2)** (the 90 degree angle is the upward facing side)

2 – Repeat Step 1 on the opposite side of the harvest box

Bottom

3 – Flip the harvest box over so that the bottom is exposed

4 – Using wood glue, or another comparable adhesive, place a thin layer of glue around the inner rim of the harvest box bottom

5 – Place the **Bottom Board (#4)** in the cavity containing the glue as shown below

6 – Hold board down with pressure for 30 seconds to ensure a lasting fit

*** Checkpoint * - Your Harvest Box is now complete!
Please refer to the displays below to ensure the
proper construction**

Congratulations on your very own Harvest Box!! Enjoy!
